CHANDRA BHANU BISHT

Full Stack Developer | MERN Stack | AI Applications | DevOps
sauravbisht0487@gmail.com | +91 8191897337 | LinkedIn | GitHub

SUMMARY

B.Tech Computer Science student (2023-2027) specializing in full-stack **MERN development** with **React.js, TypeScript, Node.js, Express.js, and MongoDB**. Experienced in REST APIs, JWT authentication, layered backend architecture, **Docker/CI-CD** deployment, and AI-powered workflows using the **Google Gemini API** and **RAG-based systems**. Currently a Full Stack Development Intern at **Buildsy**, contributing to a live e-commerce platform, with prior experience building responsive React.js interfaces at **Pantech.ai**.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, C++, C, HTML5, CSS3 | Frontend: React.js, Tailwind CSS, Bootstrap, Responsive Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Socket.IO | Databases: MongoDB, Mongoose, SQL, Vector Databases

AI / GenAI: Google Gemini API, RAG, Embeddings, Vector Search, Prompt Engineering

DevOps / Cloud: Docker, GitHub Actions, CI/CD, Linux, Cloud Deployment | Tools: Git, GitHub, Postman, VS Code, npm, MongoDB Atlas

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems

EXPERIENCE

Full Stack Development Intern — Buildsy Jul 2026 - Present
College-facilitated Internship — Remote

- Developed and maintained **3 full-stack features** for a live **WordPress/WooCommerce** e-commerce platform, including an Inspiration Gallery, Tiles Uploaded section, and broken-link fixes.
- Conducted a **UX audit** that identified **6-7 usability issues**, categorized findings by priority, and presented recommendations to **4-5 company stakeholders**, contributing to product improvement decisions.
- Built an automated **Python** image-processing pipeline using **NumPy and SciPy** to crop and export standardized catalog images across **15+ product codes**, reducing manual work from ~3 hours to 30 minutes (**~83% reduction**).
- Collaborated within a **5-member team** to contribute to ongoing development and maintenance of the live platform.

Web Development Intern — Pantech.ai Jul 2025 - Oct 2025
Remote

- Built **1-2 responsive React.js features** using reusable, component-based architecture for a web application.
- Integrated **REST APIs** for user management, dashboards, and product-purchase workflows, enabling dynamic data rendering and client-server communication.

PROJECTS

AI-SDLC Platform — AI-Powered Software Development Lifecycle Platform
React.js, TypeScript, Node.js, Express.js, MongoDB, Gemini API, GitHub API, Docker, CI/CD

- Built a full-stack AI-SDLC platform covering a **6-stage workflow** (Organization → Project → Requirement → User Story → Code → GitHub), with **4 core entities** supporting complete **CRUD** operations.
- Designed a **6-layer backend architecture** (Routes → Middleware → Controllers → Services → Repositories → Models) with **JWT authentication**, protected routes, and ownership-based access control.
- Integrated **Google Gemini API** to transform requirements into **3 structured user stories** and generate **5 source-code files** through schema-constrained AI workflows.
- Integrated **GitHub API** to automatically create repositories and push AI-generated source code, connecting AI code generation with version control.
- Containerized backend services with **Docker** and implemented **CI/CD pipelines** using **GitHub Actions**; developed the **React + TypeScript** frontend with reusable components and route-level lazy loading.

Backend: github.com/sauravbisht0487-png/AI-SDLC_15_8 | Frontend: github.com/sauravbisht0487-png/ai-sdlc-frontend

EduFlow — AI-Native Learning Management System
MERN Stack, TypeScript, RAG, Vector Database, Gemini API, Socket.IO, Clerk, Stripe

- Built an **LMS** enabling educators to publish courses and students to enroll, stream content, track progress, and leave ratings, with **Clerk authentication** and role-based access control.
- Developed dashboards, search/filtering, and enrollment tracking, with **Stripe** payment integration and **MongoDB Atlas** for persistent data storage.
- Implemented **RAG-based AI learning assistance**, retrieving relevant course content from a vector database to generate context-aware answers, plus real-time course/community chat via **Socket.IO**.

EDUCATION

B.Tech in Computer Science Engineering (2023-2027) — VMSB, Uttarakhand Technical University

Class XII — CBSE, St. Mary's Senior Secondary School — 89.8%

Class X — CBSE, St. Mary's Senior Secondary School — 87%

Relevant Coursework: DSA, Full Stack Web Development, OOP, DBMS, Operating Systems
